## **Testimonials for the Audio course © 2002**

“Edith Hathaway has provided a practical and very interesting audio course on Vedic chart interpretation ascendant by ascendant, using famous and well-known charts and their life details that everyone can easily cross reference and understand. The course is a much needed, important and invaluable resource for all students who want to know how to read the Vedic chart in a thorough and systematic manner.”

**David Frawley**, Santa Fe, New Mexico, USA, summer 2002

“I want to thank you for the great benefit the tapes are in helping me glue more and more of the Vedic stuff together. You might also be interested to know that you have now travelled many miles around Cape Town in my car, in voice if not in person – after I’ve been through the tape with the charts I listen to it again a few times to help it sink in. BTW, your Sanskrit pronunciation is fantastic – have you studied the language too? (I do study it and it’s a pleasure to hear the proper pronunciation rather than an accented one!)

**Rod Suskin**, Cape Town, South Africa, Feb. 2004

“I want to thank you for the wonderful job you did creating your awesome Audio Course through the Ascendants. I loved to listen through it and will just start to do so again from the very beginning. This is a *Jyotish* highlight to follow your words through the charts.”

**Bernd Roessler**, Sauerlach, Germany, July 2004

“As I have learned *Jyotisha* I find these [tapes] useful to me, my book on tape when I am traveling, which is often...”

**Madlyn Pisciotta**, Truckee, California, USA, May 2011

### **Introduction from Edith Hathaway: Aug. 2015**

This Audio course was originally released in Aug. 2002 as a collection of 12 cassette tapes, one for each Ascendant chart, plus a choice of either North Indian or South Indian charts in two separate workbooks. Each audio file (92 min.) is now available in mp3 format. The 12 segments total 18 hrs. 24 min. and qualify for at least 20 credits in most Vedic astrology accreditation programs in the United States and elsewhere.

Preceded by a short general introduction to the Ascendant chart being discussed (i.e. Aries on the first audio file, Taurus on the second, etc.), there are four to six individual charts discussed per audio file, 62 biographies and charts in total. Most of those are discussed in some depth, with the use of rich biographical detail to confirm and amplify all the Vedic astrological markers. Chart examples have been selected to illustrate a wide variety of lives and life situations that enable the student to better learn the 12 Ascendant charts. The student is strongly encouraged to listen and study the audio files in sequential order, as details are developed in a cumulative fashion, with frequent references to charts discussed on previous audio files – comparing and contrasting them for the student’s benefit. In the process, I have included various facets of *Nadi* astrology – a profound branch of Vedic astrology that uses the *nakshatras* and *nakshatra* lords in providing some incisive and lesser-known predictive techniques in Vedic astrology.

Since I created and produced this course there are inevitably some updates in information, both in terms of biography and birth data. As much as possible I avoided biographical subjects with controversial birth times, but they do crop up at times after the fact, when new information becomes available. These updates are noted entirely on the PDF and not on the audio files, which remain unaltered from those I released as a collection of 12 cassette tapes in Aug. 2002. Thus, it is important to review the PDF for any updates, especially whenever a question may arise as to corrected information, however minor it may be. This provides the basis for greater accuracy. Further, it will give you some key follow-up details on some of the biographical material, and on events occurring since Aug. 2002. Even fuller details can be found on the biographical subjects included in my 2012 book *In Search of Destiny*.

For all birth data used in this Audio course I used the best source available to astrologers up to summer 2002, i.e. the latest Lois Rodden Astrodata collection, then in software format, called AstroDataBank (ADB) 4.0. Since that time, in 2005 AstroDataBank was sold by its software designer and owner Mark McDonough to Richard Smoot, and in 2008 by Richard Smoot to Alois Treindl and his company, Astrodienst, based in Zurich, Switzerland. From 2008 to the present, Treindl has committed to making this huge data collection available for the first time at a free website: <http://www.astro.com/astro-databank/>

### **Audio course © 2002, 2015 Acknowledgements**

As with my 2012 book, the first thanks goes to my longtime friend, mentor, and colleague Chakrapani Ullal. His unwavering encouragement and patience throughout this project was invaluable. I am grateful for his sharing with me countless hours discussing many of the birth charts included here.

Among numerous other teachers and practitioners of Vedic astrology, special thanks goes to David Frawley, a longtime resident of Santa Fe, New Mexico, where I also lived from Feb. 1983 for some 21 years. He was the first teacher with whom I studied the subject. His book and course *Astrology of the Seers* were seminal in my learning process, as was his sharing of his broad knowledge of the ancient Vedic culture and traditions. Among the astrologers from India whose teachings, books and lectures were especially influential were the late B.V. Raman, Dr. K.S. Charak and K.N. Rao, all of whom I met from 1992 onward.

Also residing in Santa Fe, New Mexico in 2002 were my longtime friends and colleagues Alan Oken and Arielle Guttman, both Western tropical astrologers. I first met Alan Oken in 1983, David Frawley in 1985, and Arielle Guttman in 1986, and there were many local astrology events many of us participated in together, most often organized by Arielle Guttman. Then in early 2002 Alan Oken asked me to create and produce this audio course for the Audio library collection at The Wisdom School, the first-ever Vedic course at The Wisdom School, founded by Oken. I am grateful to Alan Oken for that opportunity, which was to be the precursor to my book published in 2012.

### ***In Search of Destiny: Biography, History & Culture As Told Through Vedic Astrology*, ©2012 by Edith Hathaway**

This book contains many of the same biographical subjects from the 2002 Audio course. But in each biographical study the material is deepened and expanded considerably, including in Chapter 1: "Historical Context and Collective Destiny," and Chapter 2: "Introduction to Vedic Astrology and Philosophy." The sequence is important in both the book and the audio course, but differs slightly in the book due to some biographical subjects being dropped and others added. Also, the audio course contains 62 biographical studies covering all 12 Ascendant charts, Aries through

Pisces, while the 2012 book contains 31 biographical studies covering 7 Ascendant charts, Aries through Libra.

Ascendant charts Scorpio through Pisces will be covered in Volume two of *In Search of Destiny* (currently a work-in-progress, publication date to be announced). In only four cases (Albert Einstein, Francis Poulenc, Maria Montessori, and Ammachi) there are slight differences in birth data from audio course to book, mostly involving minor differences in Local Mean Time used. In each case the 2012 book has the corrected data. These changes are noted below under Audio course Addenda & Errata. The sidereal zodiac *Lahiri ayanamsha* was used in both book and audio course.

For editorial reviews and testimonials of *In Search of Destiny* © 2012, please see <http://www.edithhathaway.com/reviews.html> The book is available at Amazon in both paperback and e-book format, also in book stores. It has continuously ranked no.1 in “Top Rated” books” among Kindle books on Eastern astrology. See readers’ reviews at <http://www.amazon.com/In-Search-Destiny-Biography-Astrology/dp/0615544479>

### **Audio Course Prerequisites**

Students must know the basics of Vedic astrology. This includes the essential meanings of the 9 classic planets (*grahas*), the 12 signs (*rashis*) of the zodiac, the 12 houses (*bhavas*), and planetary aspects (*drishtis*). They should have some general knowledge of the background of Vedic astrology and how it differs from Western tropical astrology, including its use of the sidereal zodiac, the 27 *nakshatras*, the *dasha* systems (especially the *Vimshottari dasha* system), divisional or *varga* charts, signifiers (*karakas*), and planetary combinations (*yogas*). They should know that in Vedic astrology planetary aspects, transits, house lordships and house meanings differ from Western tropical astrology.

### **Audio Course Objectives**

This course enables the Intermediate level student of Vedic astrology to have more fluency in Vedic chart analysis, understanding the chart more immediately based on not only the sign of the Ascendant, but on various permutations of the planetary groupings – by sign, *nakshatra*, house, aspect, and *yoga* combination. With greater fluency comes the possibility of seeing the astrological chart and thus the life and karmic destiny in greater depth.

### **Audio Course Addenda & Errata** © 2002, 2015 by Edith Hathaway

**General note & summary:** Research updates can bring some changes in birth data, in this case involving mostly slight differences in reported Local Mean Time (LMT), with some of the birth dates prior to 1900. Out of a total of 62 charts, there are 11 such cases, most of them creating only minor changes in Ascendant degree. Due to

new research, another six charts indicate a possible change in Ascendant sign: Lyndon B. Johnson, Leonard Bernstein, Franklin D. Roosevelt, J. Edgar Hoover, George Sand, and Ariel Sharon. (Charts 19, 24, 25, 48, 54 and 61) Some of these were considered Class A or AA data until recently (AstroDataBank). Even so, Lyndon B. Johnson remains a convincing case for Cancer Ascendant, FDR for Leo Ascendant, and Sharon for Pisces Ascendant. With Johnson, either way, much attention is given on the audio file to his five planets in Leo. Please regard these six charts for study as hypothetical charts.

Addenda & Errata are noted in the PDF and not in the audio files, which remain unaltered from the original 2002 version. All 62 birth charts in this collection have been recalculated in Shri Jyoti Star v. 7 software, a different software program from that used in 2002, and double-checked with Solar Fire Gold v. 8. Due to slight variations in Local Mean Time, both in new research and software program differences, in several cases the Ascendant degree on the birth chart differs slightly from what I discuss on the 2002 audio files, as noted above. In a few cases, this causes the *Navamsha* Ascendant to change. Another variant is that in 2002 I was using True nodes for calculating Rahu and Ketu. But I have used Mean nodes for over 12 years now, so this too alters the degree status of Rahu and Ketu. While only slight, at times it changes their position in the *Navamsha* chart. Mean nodes are used throughout my 2012 book, *In Search of Destiny*. Data updates from the 2002 Audio file are also referenced with the birth charts in the Full Version PDF. See more details further below under each Ascendant chart section, including updates on life events. First is a **short summary on data changes**:

- Gemini Ascendant: **Albert Einstein**. His Ascendant degree changes from 18:11 Gemini to 19:28 Gemini. His *Navamsha* Ascendant remains Pisces. Using Mean node, *Navamsha* Rahu moves to Pisces, *Navamsha* Ketu to Virgo.
- Gemini Ascendant: **Francis Poulenc**. His Ascendant degree changes from 22:33 Gemini to 21:53 Gemini. *Navamsha* Ascendant remains Aries.
- Cancer Ascendant: **Maria Montessori**. Her Ascendant degree changes from 22:22 Cancer to 22:30 Cancer. *Navamsha* Ascendant remains Capricorn.
- Cancer Ascendant: **Lyndon Baines Johnson**. His Ascendant sign may change from Cancer to Leo.
- Leo Ascendant: **Paramahansa Yogananda**. His Ascendant degree changes from 9:15 Leo to 6:30 Leo. *Navamsha* Ascendant changes from Gemini to Taurus, *Navamsha* Moon from Taurus to Aries.
- Leo Ascendant: **Leonard Bernstein**. His Ascendant sign may change from Leo to Libra.
- Leo Ascendant: **Franklin Delano Roosevelt**. His Ascendant sign may change from Leo to Virgo.
- Libra Ascendant: **Ammachi**. Her Ascendant degree changes from 23:18 Libra to 23:35 Libra. Her *Navamsha* Ascendant sign changes from Aries to Taurus. Using Mean node, *Navamsha* Rahu moves to Aquarius, *Navamsha* Ketu to Leo.
- Libra Ascendant: **George Harrison**. His Ascendant remains in Libra, but there

are variations of reported birth times within a 21 minute time span. The *Navamsha* Ascendant ranges from Scorpio through Capricorn.

- Scorpio Ascendant: **Maria Callas**. Her Ascendant remains in Scorpio, but see data updates further below. <http://www.astro.com/astro-databank/Callas, Maria>
- Scorpio Ascendant: **Caroline Kennedy Schlossberg**: Due to errors in the previous software, giving the Latitude incorrectly as 47N06, the Ascendant degree changes from 22:13 Scorpio to 26:58 Scorpio. The *Navamsha* Ascendant sign changes from Capricorn to Pisces.
- Sagittarius Ascendant: **Queen Elizabeth II**. Difference in software changes the Ascendant degree from 27:19 Sagittarius to 28:33 Sagittarius.
- Sagittarius Ascendant: **Prince William, Duke of Cambridge**. Difference in software changes the Ascendant degree from 3:52 Sagittarius to 3:49 Sagittarius.
- Sagittarius Ascendant: **J. Edgar Hoover**. His birth data is currently rated at AstroDataBank as XX, defined as "Data without a known or confirmed date...." As with Maria Callas, several birth dates were given to the public at different times. <http://www.astro.com/astro-databank/Hoover, J. Edgar>
- Aquarius Ascendant: **Gertrude Stein**. Her Ascendant degree changes from 2:26 Aquarius to 10:31 Aquarius. Her natal Moon changes from 15:33 Leo to 15:43 Leo. Her *Navamsha* Ascendant changes from Libra to Capricorn.
- Aquarius Ascendant: **George Sand**. Her Ascendant may change from Aquarius to Libra. See details further below re new research info. as of late 2011. AstroDataBank has revised the Class AA status of data used up to that time: July 1, 1804, 22:30 LMT, Paris, France, and as used in the 2002 audio course. ADB now considers 15:00 LMT on this date as correct, giving 18:19 Libra Ascendant, natal Moon 1:02 Aries, Pisces *Navamsha* Ascendant. Consider the Aquarius Ascendant chart a hypothetical chart.
- Aquarius Ascendant: **Jeanne Calment**. Her Ascendant degree changes from 17:37 Aquarius to 12:08 Aquarius. Her *Navamsha* Ascendant changes from Pisces to Capricorn. With Mean node, *Navamsha* Rahu moves from Aquarius to Pisces, *Navamsha* Ketu from Leo to Virgo.
- Pisces Ascendant: **Theo Van Gogh**. His Ascendant degree changes from 11:02 Pisces to 11:43 Pisces. Using Mean node, *Navamsha* Rahu moves from Scorpio to Libra, *Navamsha* Ketu from Taurus to Aries.
- Pisces Ascendant: **Ariel Sharon**. His birth data has become more questioned since 2002 and still considered Class C data at AstroDataBank, i.e. "Accuracy in question." Consider the Pisces Ascendant chart a hypothetical chart.

## Audio Course Addenda & Errata, © 2002, 2015, cont'd

### PART I : Aries Ascendant charts

- **Robert Kennedy**: He has natal Rahu and Ketu in Direct motion, more rare – using True Node. Even so, this phenomenon is not considered important in classic Vedic astrology, where Rahu and Ketu are viewed as perpetually in retrograde motion. This is as measured as Mean nodes, which I use.

- **Henry Miller:** **a)** Using Mean node, *Navamsha* Rahu and Ketu move to Capricorn and Cancer, respectively. **b)** Miller wrote *Tropic of Cancer* in 1931-32 while living in France. It was first published Sept. 1, 1934 in Paris, and was banned for many years in the West. When Grove Press published *Tropic of Cancer* for the first time in the United States (June 24, 1961), it led to an obscenity trial that tested U.S. pornography laws in the 1960s.

### **PART 2: Taurus Ascendant charts**

- **Julia Child:** **a)** Her first cookbook was released in Aug. 1961, the official publication date being Oct. 16, 1961, during her Saturn-Mercury *dasha*. **b)** Jupiter is the *karaka* (significator) for husband, NOT for marriage. Venus is *karaka* of marriage.

### **PART 3: Gemini Ascendant charts**

- **Albert Einstein:** **a)** His birth time zone should be LMT 00:40:00. This changes the Ascendant degree from 18:11 Gemini to 19:28 Gemini, and natal Moon from 22:17 Scorpio to 22:21 Scorpio. **b)** Using Mean node, Rahu is at 9:18 Capricorn, Ketu at 9:18 Cancer. *Navamsha* Rahu is then in Pisces on the *Navamsha* Ascendant, and Ketu is in the *Navamsha* Descendant.
- **Bill Gates:** **a)** He left Harvard in 1975 in his junior year, not his freshman year. He thought of it as being “on leave” rather than dropping out. This also appeased his concerned parents. **b)** First incorporation date of Microsoft was June 25, 1981, Bellevue, Washington.
- **Peter Jennings:** He died of lung cancer Aug. 7, 2005 at ca. 11:30 pm EDT, Manhattan, NY. A smoker from ages 11 to 50 (1988), he started again as of Sept. 11, 2001.
- **Francis Poulenc:** Due to slight differences in Local Mean Time, from 00:06:00 to the corrected 00:09:20, his Ascendant moves from 22:33 to 21:53 Gemini.

### **PART 4: Cancer Ascendant charts**

- **Maria Montessori:** She was born Wednesday, Aug. 31, 1870, 3:23 AM LMT, Chiaravalle, Italy, Long.13 E 19, Lat. 43N 36, *Lahiri ayanamsha* -22:02:47. Ascendant: 22:30 Cancer. Class AA data, though two options are given: Birth certificate quoted from Rodden’s *AstroDataBank* gives 2:40 AM GMT, with 14:15 Cancer Ascendant. Rodden also cites Gauquelin, Vol. 2, 1509 with 3:30 AM Rome time, and 22:28 Cancer Ascendant. The discrepancies in Rodden’s data arise from her using GMT instead of LMT, the latter being correct. Rob Couteau at [www.dominantstar.com](http://www.dominantstar.com) gives 3:33:20 AM LMT, Chiaravalle, Italy, with a 24:28 Cancer Ascendant, and Aquarius *Navamsha* Ascendant. (The major discrepancy is between Capricorn and Aquarius *Navamsha* Ascendant. I prefer Capricorn to Aquarius *Navamsha* Ascendant, rectifying to 3:23 AM

LMT, Chiaravalle, Italy, a time corresponding exactly with the Gauquelin data at 3:30 AM LMT Rome time, for Rome, Italy. The Capricorn *Navamsha* Ascendant gives five planets in *kendras*, including four classic benefic planets. This *Navamsha* chart more accurately reflects Montessori's life.)

Maria Montessori's only child was born March 1898 after she completed medical school. The father of the child (Dr. Montesano) was a colleague and fellow student. She was reunited with her son Mario towards the end of her Saturn *dasha*, and he worked with her closely for the remaining decades of her life. There appears to be no substantiation for the rumored affair with Benito Mussolini.

- **Marilyn Monroe:** a) Her biological father was unknown to her. b) Her mother Gladys and her grandmother were both mentally unstable. c) Monroe suffered from endometriosis, making her menstrual cycles very painful and pregnancy unlikely to impossible. d) She signed her first movie contract July 23, 1946.
- **Indira Gandhi:** Using Mean node, natal Rahu is 10:33 Sagittarius, Ketu 10:33 Gemini. *Navamsha* Rahu is then in Cancer, *Navamsha* Ketu joins Saturn in Capricorn.
- **Prince Charles of Wales:** His second marriage to Camilla Parker-Bowles, later Duchess of Cornwall, occurred on Sat., April 9, 2005, first at a civil ceremony begun at 12:30 PM BST at Guildhall, followed by a prayer service at 2:30 PM at St. George's Chapel at Windsor Castle. It had been scheduled for the previous day, the day of a solar eclipse, but the funeral of Pope John Paul II took place on April 8th in Rome. Prince Charles was required to attend the Pope's funeral, and the wedding was re-scheduled at the last minute.

The next royal British wedding, that of Prince William and Kate Middleton, was held on April 29, 2011, the day after the exhuming of the coffin of Pope John Paul II prior to his beatification on May 1, 2011 in Rome. This was another joining of royal and religious themes, both of them with four to five transiting planets in Pisces.

- **Lyndon Baines Johnson:** a) The Audio file gives his birth time as 4:18 am CST, with 17:08 Cancer Ascendant, while the chart presented in the full 2015 PDF collection is Aug. 27, 1908, 5:00 am CST, Stonewall, TX. As recently as May 2009, LBJ's birth data was given at AstroDataBank as 5:00 am (Asc. 25:47 Cancer) and considered Class A, from memory. Since then it has been reduced to Class C ("Accuracy in question"), with new information available, including slight differences in locations within Texas. Stonewall, TX should now be used, though the typical time range is between 4:18 am and 6:11 am, sunrise being at 6:12:13 am CST. At 5:20 am the Ascendant goes to Leo, moving the 7<sup>th</sup> lord to the 8<sup>th</sup> house, not fitting the long-term role and status of wife Lady Bird Johnson. Using 5:00 am CST, as given here, Jupiter *Dasha* begins Sept. 17, 1964. Shortly thereafter, LBJ won the U.S. Presidency on his own terms and by a landslide. b) The audio file states that "Jupiter *Dasha* brought him down." In truth, it brought him up, then down. His resignation came in JU-SA period, coinciding with each planet's return by transit. c) On the *Sanyasin yoga*, with four or more planets in one

house of the birth chart, to qualify as a *Sanyasin yoga*, B.V. Raman says one of those planets must be 10<sup>th</sup> house lord. In his book *Yogas of Astrology*, Dr. K.S. Charak says that the 10<sup>th</sup> lord's involvement in a four planet combination in a benefic house is a strong factor promoting asceticism. Charak does not make the 10<sup>th</sup> lord's presence a requirement for this *yoga*, but simply the four planets must be in one house, not including Rahu or Ketu in the count.

## **PART 5: Leo Ascendant charts**

- **Paramahansa Yogananda:** Though this is Class A data, from memory, slight changes in the Ascendant degree occur due to differences in LMT (Local Mean Time) calculations used in current software (Shri Jyoti Star) from that used in 2002. LMT changes from -05:21:00 to 5:33:28. Ascendant changes from 9:15 Leo to 6:30 Leo. *Navamsha* Ascendant changes from Gemini to Taurus.
- **Leonard Bernstein:** The 6:06 am EDT birth time used here (Aug. 25, 1918, Lawrence, MA) was given as Class A data in Lois Rodden's *American Book of Charts*, 1980: Dewey, "from him [Bernstein] to Charles Cook in *Leek's Astrology*, June 1972." Since that time Bernstein's data has been listed at the free website *AstroDataBank* as 1:00 pm, Class B data, giving a 29:00 Libra Ascendant (sidereal zodiac), but the correct Ascendant may still be in question. Please regard his Leo Ascendant chart as a hypothetical chart and study it as such.

Re Bernstein's Moon and Venus in water signs, there is a little known rule in Vedic astrology that says that Venus and Moon in water signs are excellent for music regardless of house position. In this case, Venus – *karaka* for music and the arts – is in Cancer in the birth chart and in Scorpio in the *Navamsha* chart. Water is an emotional and thus potentially passionate element. Music is an exacting art, but also expresses the emotions and connects to people's emotions and emotional memories.

- **Franklin Delano Roosevelt:** B.V. Raman in *Notable Horoscopes* (6<sup>th</sup> edition, 1991) gives an 8:00 PM birth time, while David Frawley uses 8:30 PM in *Ayurvedic Astrology* (2005). Though neither Raman nor Frawley quote a source for their birth data, both use a Leo Ascendant. Scorpio *Navamsha* Asc. runs from 8:06 to 8:22 pm LMT. As of 2002 *AstroDataBank 4.0* listed FDR as Class A data (sidereal Leo Ascendant), though since its source is biography it should be Class B. *AstroDataBank* has since revised Roosevelt to Class AA data, based on FDR's father's diary as quoted in a 2005 biography, *Sara and Eleanor*, p. 59: "At quarter to nine my Sallie had a splendid large baby boy, 10 lbs." Using 8:45 PM LMT, the Ascendant is 1:03 Virgo. A case can definitely be made for Virgo Ascendant for the birth chart. Either way, the Ascendant lord falls in the 6<sup>th</sup> house – indicating the potential for major health problems. The audio file refers to a chart based on 8:00 pm (Jan. 30, 1882, Hyde Park, NY), which with slight correction in LMT to 4:55:44 gives 22:12 Leo Ascendant. Regard this as hypothetical for study purposes.

## PART 6: Virgo Ascendant charts

- **Sir Winston Churchill:** Using Mean node, *Navamsha* Rahu moves to the *Navamsha* Ascendant in Aries, *Navamsha* Ketu to Libra in the 7<sup>th</sup> house.
- **Kenneth Lay:** As C.E.O. of Enron, he was convicted on May 25, 2006 of all six counts against him, including conspiracy to commit securities and wire fraud. Lay also was convicted of bank fraud and making false statements to banks in a separate trial. His case was an embarrassment to the Bush administration, and caused them concern as they faced the 2006 mid-term elections. Lay's family estate was also greatly at risk. But all that was absolved when Lay died suddenly of a heart attack shortly after 3:00 AM, Wed. July 5, 2006, in Aspen, Colorado. He was disgraced at the time of death. However just six years earlier he was the most significant financial contributor to George W. Bush's presidential campaign, and played a major role in shaping his administration's energy policies. At the time of his death, Lay was awaiting his sentence, scheduled for Oct. 23, 2006. It was also rumored he was requesting a pardon from President George W. Bush. Due to his death and the timing of it, the government cannot collect \$43.5 million from his estate, the amount prosecutors claimed he stole from Enron before it collapsed in 2001. A fraud and conspiracy conviction case against Ken Lay was dismissed by a federal judge Oct. 18, 2006.
- **Françoise Gilot:** **a)** See above under Cancer Ascendant charts (President Lyndon Baines Johnson). Whereas Johnson has five planets in his 2<sup>nd</sup> house, Gilot has four planets in the 1<sup>st</sup> house. Rahu cannot be counted. **b)** Using Mean node, *Navamsha* Rahu moves to Cancer in the 7<sup>th</sup> house, *Navamsha* Ketu to the *Navamsha* Ascendant in Capricorn.

## PART 7: Libra Ascendant charts

- **Adolf Hitler:** Using Mean node, *Navamsha* Rahu moves to Taurus in the 7<sup>th</sup> house, conjoining Mercury, *Navamsha* Ketu to the *Navamsha* Ascendant in Scorpio, conjoining Mars and Venus.
- **Mahatma Gandhi:** **a)** Using Mean node, his *Navamsha* Rahu moves to the 12<sup>th</sup> house in Libra, *Navamsha* Ketu to the 6<sup>th</sup> house in Libra. **b)** His death occurred Jan. 30, 1947 – NOT 1948 – as mistakenly mentioned on the audio file. It is also stated that he was assassinated 7 ½ months prior to India's independence from Great Britain. That is correct. India's independence occurred Aug. 15, 1947.
- **Ammachi:** **a)** Though still Class B data, her birth time changes from 9:09 to 9:10 am IST, causing a change in birth Ascendant from 23:18 Libra to 23:35 Libra. *Navamsha* Ascendant changes from Aries to Taurus. **b)** Using Mean node, her *Navamsha* Rahu moves to Aquarius, *Navamsha* Ketu to Leo. **c)** Her ability to gain wealth is mentioned. As a saint and spiritual leader, this has manifested chiefly in the realm of fundraising on a very large scale for her numerous charitable projects in India. These include the AIMS hospital, a hospital for the poor, an engineering college, 25,000+ homes for the

poor, especially for widows and single women without financial means. The majority of the charitable contributions come from Westerners, most of whom are Ammachi devotees.

- **Jacqueline Kennedy Onassis:** Different parts of the body are attributed to each sign. For instance, Aries applies to the head. It has been mentioned that John F. Kennedy, then U.S. President, was assassinated in Jackie's Moon-Rahu period. She in turn died in her Rahu-Moon period. Both planets are situated in the sign of Aries in her 7<sup>th</sup> house of partnership, relating to spouse, and also giving them *maraka* status. President Kennedy died of a gunshot wound to the head. Jackie herself died of brain cancer, a tumor in the area of the brain.
- **George Harrison:** There are some variants on George Harrison's birth data, mostly due to different data he gave out personally, either "from memory" or as "rectified by an astrologer." From 1992 and 1993 onwards, he gave out various times, including 11:52 pm Feb. 24, 1943, Liverpool, UK; also 00:05 and 00:10 Feb. 25, 1943, Liverpool, UK. The latter is supported by his sister, who says she saw a birth record in her mother's handwriting, and that her mother was awake and alert at the time of his birth. It gives an Ascendant of 10:10 Libra, and moves the *Navamsha* Ascendant to Capricorn. The birth time of 23:49 used on the 2002 audio file was taken from the latest Lois Rodden astrodata available in 2002, then in software format, AstroDataBank (ADB) 4.0. AstroDataBank website now lists Harrison's birth data as Class A, from memory: Feb. 24, 1943, 23:42 GDT.

## **PART 8: Scorpio Ascendant charts**

- **Introduction to Scorpio Ascendant charts:** Re the Colorado forest fires of June 2002, known as the Hayman fire: When using current breaking news, as in this case, there is always the possibility of updates with conflicting information. As stated on the recording, U.S. Forest Service employee Terry Barton (an 18-year veteran of the Forest Service) admitted to accidentally causing the forest fire June 8<sup>th</sup> by burning a letter from her estranged husband. This was at a time of very high fire danger due to extreme drought. Her husband later said he had not sent her a recent letter, though one of Terry's daughters says she put an old love letter of his in her mother's lunch bucket that day, hoping for their reconciliation. Another teenage daughter testified in court that "a psychology teacher had told Ms. Barton to write her feelings in a letter and burn it." <http://www.nytimes.com/2003/03/06/us/national-briefing-rockies-colorado-added-term-in-forest-fire.html>

Many conflicting stories emerged around this point, including investigations of the campsite fire pit in question, which showed no sign of burned paper ashes, and these are known to be traceable; also, allegations that Barton started the fire so she could report it and be a hero. However, Barton's signed confession was that she burned a letter from her husband at a campsite. If true, it indicates a scenario in which one woman's anguish burned down a huge area of forest land plus private homes. In court hearings Sept. 2008 she said she was "emotionally amiss" at the time. As a result of

her actions, which the courts determined were arson, 138,114 acres in southern Colorado burned between June 8 and July 18, 2002. Barton was charged with setting Colorado's largest-ever wildfire, and sentenced by the state of Colorado to 12 years in prison, and by a federal sentence to 6 years in prison. She served a reduced prison sentence of 5 years and was fined \$14.6 million in restitution plus another \$30 million. Whatever is the truth of how the fire started, we can reflect on the parallels offered in this story as a way of better understanding the astrological principles given. On June 8, 2002, transiting Moon, Mercury, Sun, Saturn, Ketu in Taurus – the latter three closely opposite Pluto and Ketu in Scorpio – preceded a Solar eclipse on June 10<sup>th</sup> at 25:36 Taurus (sidereal zodiac). By June 10, 2002, the Hayman fire had already claimed 86,725 acres and would burn another 51,389 acres.

- **Marlon Brando:** The movie *The Godfather* was released in 1972, and Brando received his Oscar award for Best Actor in this film at the Academy Award ceremonies held March 27, 1973. It was mistakenly mentioned that he received this award in 1972.
- **Maria Callas:** The Ascendant remains in Scorpio, but varying birth data has emerged since 2002 altering both the date and time. Current birth data at AstroDataBank (2015) is given as Dec. 3, 1923, 6:00 am EST, NY, NY. Class A, from memory. But various birth times have been presented previously – mostly around dawn, and three dates: Dec. 2, 3 or 4. Birth data used in the 2002 audio course (Dec. 2, 1923, 7:07 am EST, NY, NY) was Class A data in AstroDataBank up to that time, from a birth certificate. Ascendant is 16:42 Scorpio. However, since then several other birth dates and times have emerged, some “from memory” from Maria Callas, who preferred Dec. 4, as it was St. Barbara's day, and her mother gave that date, but also spoke of a snowstorm – which did not occur according to NY meteorological records. Callas also gave Dec. 3, 1923 at 6 am, NY, NY. The latter gives an Ascendant of 4:02 Scorpio and a Leo *Navamsha* Ascendant. AstroDataBank favors the latter over the Dec. 2, 1923 birth certificate, as Callas used it in consulting local astrologers some of whom were also data collectors. Even so, birth info. from both Callas and her mother are conflicting. [http://www.astro.com/astro-databank/Callas,\\_Maria](http://www.astro.com/astro-databank/Callas,_Maria) Just as AstroDataBank has departed from its usual rule of giving priority to the birth certificate, this author has to depart from the latest data choice by AstroDataBank. This is in part because the birth certificate data used in the 2002 audio course more accurately reflects the Vedic chart, notably the *Vimshottari Dasha* sequence.
- **Caroline Kennedy Schlossberg:** Due to errors in the previous software, giving the Latitude incorrectly as 47N06, the Ascendant degree changes from 22:13 Scorpio to 26:58 Scorpio. The *Navamsha* Ascendant sign changes from Capricorn to Pisces.

## **PART 9: Sagittarius Ascendant charts**

- **Queen Elizabeth II.** Difference in software changes the Ascendant degree from 27:19 Sagittarius to 28:33 Sagittarius.
- **John Belushi:** He died March 5, 1982, NOT Apr. 5, 1982. He was 33 years old. His Moon *dasha* began April 29, 1982.
- **J. Edgar Hoover:** Though this date and time (either 7 or 7:30 am) was considered reliable for some years, his birth data is currently rated at AstroDataBank as XX – defined as follows: “Data without a known or confirmed date. Historic figures or certain current news figures may be of interest even with speculative birth dates.”  
<http://www.astro.com/astro-databank/Hoover, J. Edgar>  
 The chart presented in the 2015 PDF collection: Jan. 1, 1895, 7:00 am EST, Washington, D.C, Ascendant: 10:43 Sagittarius. Regard as hypothetical chart.

## **PART 10: Capricorn Ascendant charts**

- In general, **the Capricorn Ascendant chart**, OR a chart with many planets in Capricorn show a tendency to like to be visible. This may be due to Capricorn’s role as the natural 10<sup>th</sup> house sign and the 10<sup>th</sup> house are at the top of the sky. (See Gertrude Stein, with Aquarius Ascendant, but four planets in Capricorn in the 12<sup>th</sup> house.)
- **Beverly Sills:** She died July 2, 2007, age 78, of inoperable lung cancer. She was then in Jupiter-Venus *Dasha*.
- **Michael J. Fox:** Difference in software changes Ascendant from 25:13 Capricorn to 25:17 Capricorn.

## **PART 11: Aquarius Ascendant charts**

- **Gertrude Stein.** The 2002 audio course gives her Time zone as +5:00:00, whereas it should be given in LMT as 5:20:04. This, together with a longitude change (see below), moves the birth chart Ascendant from 2:26 Aquarius to 10:31 Aquarius, natal Moon from 15:33 Leo to 15:43 Leo, and *Navamsha* Ascendant from Libra to Capricorn. Using Mean node, Rahu is 18:07 Aries. The latest update from AstroDataBank cites her birth place not as Allegheny but as Allegheny City, PA, giving a change in birth longitude from 80W01 00 to 79N50. Quoting *Wikipedia* on Allegheny City (1788–1907). “[It] was a Pennsylvania municipality located on the north side of the junction of the Allegheny and Ohio rivers across from downtown Pittsburgh. It was annexed by Pittsburgh in 1907.”
- **George Sand: a)** The 2002 Audio course gives her Time zone as –00:06:00, whereas it should be listed in LMT as -00:09:20, with 12:10 Aquarius Ascendant. **b)** Her Ascendant may change from Aquarius to Libra. As of late 2011, AstroDataBank

has revised the Class AA status of data used up to that time: July 1, 1804, 22:30 LMT, Paris, France, and as used in the 2002 audio course. ADB now considers 15:00 LMT on this date & location as correct, giving 18:19 Libra Ascendant, natal Moon 1:02 Aries, Pisces *Navamsha* Ascendant. This new Libra Ascendant chart has excellent correlations with the Vedic chart analysis, notably Venus and Ketu in the 10<sup>th</sup> house, plus the timing of important events at the start of her Sun, Moon and Mars *Dashas*, marriage in Venus-Jupiter period, and her death in Jupiter-Saturn period. Consider the Aquarius Ascendant chart a hypothetical chart.

[http://www.astro.com/astro-databank/Sand\\_George](http://www.astro.com/astro-databank/Sand_George)

- **Karl Marx:** **a)** In the audio file, his natal Mars is mistakenly given as Virgo, instead of Gemini, the other Mercury-ruled sign. **b)** Marx was engaged for seven years to his future wife Jenny von Westphalen. She waited for him to complete his university and graduate education. **c)** Re the solar eclipse in his 3<sup>rd</sup> house in Aries, another way to look at it (and there are many ways) is that the more noble part of his moral philosophy – in search of a more harmonious society, less exploitative of the workers – was definitely eclipsed. It was often later used for destructive purposes by tyrants such as Lenin, Stalin, and Mao Tse Tung, who would use the name of Karl Marx and his philosophy to justify their own brutal ends.
- **J. Pierpont Morgan, Sr.:** With his natal Sun-Saturn mutual contacts, we would expect to see criticism of his dealings with other corporations and with the U.S. government. Morgan helped to bail out the U.S. government from the panic of 1893 by organizing a syndicate to float the bond issue negotiated by President Grover Cleveland. This enabled an increase of the U.S. gold reserve in 1895. But in spite of his financial rescue operation, there was still criticism of Morgan for the harsh terms of his loan. He was also widely criticized for selling obsolete carbines to the Union, for his gold speculations in the American Civil War, for his financial dominance in the Panic of 1907, and for bringing on the financial ills of the New York, New Haven & Hartford railroad. But he followed his own best advice and did not pay much attention to popular criticism of his actions.
- **Jeanne Calment.** In the 2002 audio course, her Time zone is given as -00:06:00, whereas in LMT it should be 00:18:32. This changes the birth chart Ascendant from 17:37 Aquarius to 12:08 Aquarius and *Navamsha* Ascendant from Pisces to Capricorn. With Mean node, *Navamsha* Rahu moves from Aquarius to Pisces, *Navamsha* Ketu from Leo to Virgo.

## **PART 12: Pisces Ascendant charts**

- **Theo Van Gogh.** **a)** The 2002 audio course gives his Time zone as -00:19:48, whereas in LMT it should be 00:18:40. This changes the birth chart Ascendant from 11:02 Pisces to 11:43 Pisces. **b)** Using Mean node, *Navamsha* Rahu changes from Scorpio to Libra, *Navamsha* Ketu from Taurus to Aries.

- Ariel Sharon.** **a)** His birth data has become more in question since 2002, especially whether Feb. 26 or Feb. 27 is correct. AstroDataBank: The Oct. 1986 issue of *Mercury Hour* quotes Sharon's mother (1980), via Isaac Starkman: Feb. 27, 1928, "about one hour after sunrise." Sunrise = 6:16:19 am EET. Starkman rectified the time to 7:49 am. According to Starkman (ca. 2000?) "Sharon's birthday was well documented and was investigated by Israeli astrologers 30 years ago: 27 Feb. 1928. It is also recorded in the Home Office [as such]." But later, after reading *The Shepherd, The Life Story of Ariel Sharon, 2005*, by Nir Hefez & Gadi Bloom (available only in Hebrew), Starkman revised his opinion to Feb. 26, 1928, rectifying the time to 10:18 pm, as the biography gives this earlier date, though Israeli and other sources continue to differ. Thus, since 2005 Starkman preferred the Feb. 26, 1928 chart, rejecting Sharon's mother's statement given to him in 1980. The audio file uses Feb. 27, 1928, 7:49 am EET, Kafr Malal, Israel. Long. 34E54, Lat. 32N11. Ascendant: 19:04 Pisces. This is also the chart presented in the 2015 PDF. Consider the Pisces Ascendant chart a hypothetical chart.

**b)** Sharon served as Prime Minister from March 2001 until April 2006, though he was unable to carry out his duties after suffering a stroke on Jan. 4, 2006. He fell into a coma and remained in a persistent vegetative state from that time. From May 2006 until his death Jan. 11, 2014 he was at Sheba Medical Centre, a long-term care facility near Tel Aviv. He suffered multiple organ failure in early Jan. 2014, leading up to his death. [http://www.astro.com/astro-databank/Sharon,\\_Ariel](http://www.astro.com/astro-databank/Sharon,_Ariel)
- Jeffrey MacDonald:** **a)** Using Mean node, *Navamsha* Rahu moves to Sagittarius, *Navamsha* Ketu to Gemini. **b)** He married an old friend, Kathryn Kurichh on Aug. 30, 2002. **c)** His decades-long legal case has continued to be appealed up through spring 2009, but lost some ground with the death (Feb. 2, 2009) of Mrs. Helena Stoeckley, Sr., the mother of one of the confessors to the crime. She had come forward to the defense in March 2007 with a sworn statement regarding her daughter's admissions to involvement in the murders, and the fact that the daughter had been threatened by the prosecution. **d)** MacDonald's case continues on in the courts. A hearing in federal court Sept. 2012 was based on new evidence, "...much of it [focused] on Helena Stoeckley, a young woman who on multiple occasions before her death, in 1983, confessed to various individuals that she had been present in MacDonald's home on the night of the murders [Feb. 17, 1970], and that three of her companions committed the crimes. But Stoeckley did not offer this testimony in court—according to [author Errol] Morris, perhaps because the prosecution had intimidated her and refused to grant her immunity." <http://www.newyorker.com/magazine/2012/10/15/trial-and-error-4>

**CHART 54: George Sand**, b. Sunday, July 1, 1804, 22:30 LMT, Paris, France. Long. 2E20, 48N52. Class AA data up to late 2011. [Use this chart below, and note data updates in the previous section: *Audio course Addenda & Errata*, ©2002, 2015 by Edith Hathaway.] Her Ascendant may change from Aquarius to Libra, according to new research. As of late 2011, AstroDataBank revised the Class AA status assigned up to that time: July 1, 1804, 22:30 LMT, Paris, France, and as used in the 2002 audio course. ADB now considers 15:00 LMT on this date & location as correct, giving 18:19 Libra Ascendant, natal Moon 1:02 Aries, and Pisces *Navamsha* Ascendant. This new Libra Ascendant chart provides excellent correlations with George Sand's Vedic chart analysis, notably Venus and Ketu in the 10<sup>th</sup> house, plus the timing of important events at the start of her Sun, Moon and Mars *Dashas*, marriage in Venus-Jupiter, and her death in Jupiter-Saturn period. Consider the Aquarius Ascendant chart a hypothetical chart. Ascendant: 12:10 Aquarius.

**CHART 61: Ariel Sharon**, b. Mon., Feb. 27, 1928, 7:49 am EET, Kafr Malal, Israel. Long. 34E54, Lat. 32N11. Class C data, i.e. "Accuracy in question." [Use this chart below, and note data updates in the previous section: *Audio course Addenda & Errata*, ©2002, 2015 by Edith Hathaway.] His birth data has become more in question since 2002, especially whether Feb. 26 or Feb. 27 is correct. AstroDataBank refers to the Oct. 1986 issue of *Mercury Hour*, which quoted Sharon's mother in 1980 via Isaac Starkman: Feb. 27, 1928, "about one hour after sunrise." Sunrise = 6:16:19 am EET. Starkman rectified it to 7:39 am EET, but changed his opinion after reading a 2005 biography (Hebrew only), deciding to disregard the mother's information and go with a night birth on Feb. 26, 1928. Consider the Pisces Ascendant chart a hypothetical chart. Ascendant: 19:04 Pisces.
